

TABLE OF CONTENTS OF THE PROCEEDINGS

9th Annual British Columbia ML/ARD Workshop Vancouver, BC - December 2002

A. WORKSHOP PREFACE & ACKNOWLEDGEMENTS

B. BRITANNIA - A CASE STUDY OF COLLECTION AND TREATMENT

B.1 The Britannia Mine Remediation Project - An Overview
by Gerry O'Hara

B.2 Britannia Mine - 4100 Level Plug Test: A Mine Hydrology Investigation
by Graham Parkinson, Patrick Bryan & Peter Healey

B.3 Geochemistry and Water Quality of the Britannia Mine Workings
by Kelly Sexsmith & Stephen Day

B.4 Risk Based Remediation at the Britannia Mine
by Cindy Ott & Steve Sibbick

B.5 Design of the Britannia Mine HDS Plant
by Tom Higgs

C. FIELD RESULTS OF BIOLOGICAL AND OTHER NON-TRADITIONAL TREATMENT METHODS

C.1 Information and Design Requirements for Drainage Treatment in British Columbia
by Bill Price

C.2 A Review of Sulphate Treatment Technologies for Mine Drainage: Overview
by Jan Gerits

C.3 A Review of Sulphate Treatment Technologies for Mine Drainage: Case Studies
by Jan Gerits

C.4 Microbial Ecology of Anaerobic Sulfate- and Iron-Reducing Bacteria in Sulphidic
Mine Tailings
by Danielle Fortin

C.5 Molybdenum Removal in Constructed Anerobic Wetlands
by Mark Freberg

C.6 Biogeochemical Treatment of ARD at the Island Copper Mine Pit Lake
by Clem Pelletier, Deborah Muggli, Marc Wen & George Poling

C.7 Testing Metal Removal Strategies in the Equity Silver Pit Lakes Using Limnocorrals
by John Crusius, Phil Whittle, Dennis Kramer, Roger Pieters, Tom Pedersen, Greg
Lawrence, Jay McNee, Don Dunbar, Robert Goldblatt & Albert Leung

C.8 Winter Performance of Biological Treatment Systems
by André Sobolewski

C.9 Three Case Studies of the Treatment of Mine Drainage
by Joseph Harrington

C.10 Biological Treatment of Acid Wastewater for Selective Metal Recovery and Site Remediation: Commercial Case Studies
by David Kratochvil, Michael Bratty & Johannes Boonstra

C.11 Plants Used in Phytoremediation of AMD in Mine Tailings
by Maria Gregor

C.12 Golden Sunlight Mine Bio-Treatment of Acid Producing Waste
by Rory Tibbals

C.13 Alcohol Enhanced Sulphate-Reducing Bioreactors: Better Control of Microbial Activity and Sludge Management
by Timothy Tsukamoto & Glenn Miller

C.14 A New Technology for the Treatment of Acid Mine Drainage
by J. Ming Zhuang & Tony Walsh

C.15 Why Do Some Passive Treatment Systems Fail While Others Work?
by James Gusek & Thomas Wildeman

C.16 Biological Treatment of Metals and Inorganics in Mining Waters
by Jack Adams

C.17 Long-Term Performance of Passive AMD Treatment Systems in the Eastern U.S.
by Paul Ziemkiewicz

C.18 Metals Removal from Groundwater Using Permeable Reactive Barriers (PRBs)
by David Smyth, David Blowes, Carol Ptacek & Jeff Bain

D. NEW DEVELOPMENTS

D.1 The Canadian Light Source: A New Tool for Mining and Environmental Headaches
by Jeff Cutler

D.2 Using Synchrotron Radiation to Characterize Arsenical Smelting Products
by Trevor Bergfeldt

E. WORKSHOP ATTENDEES

Hard copies of the proceedings can be purchased from BiTech
Visit www.trcr.bc.ca for details.
